ADAPTALOGIX

The Successful Path to Commercialization
How Cloud ERP Supports Gene Therapy Companies

1 CHALLENGES
ZERO TO SIXTY IN JUST MONTHS

As a new gene therapy company, you can suddenly experience a **300% increase in operational complexity** on your path to commercialization.

You are ready to start clinical trials but:

- You first have to build out your GMP manufacturing in-house to keep pace.
- You have to comply with federal regulations and Sarbanes-Oxley (SOX) accounting standards.
- You're likely handling accounting and inventory manually. Closes are dragging out and you're getting dinged on audits.

Legacy accounting and siloed platforms can't support these new SOPs.

OBSTACLES 2
INDUSTRY GROWING PAINS

Gene therapy is experiencing a **34% annual growth rate**, but the boom can create new roadblocks for you like:

Greatly compressed manufacturing timelines.

A backlog for outsourced manufacturing.

A lack of manufacturing infrastructure, technical staff, technology and established supply chains.

Legacy accounting and ERP can't scale to meet these needs.

3 SOLUTION
TAILORED CLOUD ERP

You can automate complex operations with the **AdaptaLogix GMP Manufacturing Bundle**—cloud ERP that unifies financial management, supply chains, manufacturing and distribution. You can overcome obstacles every step of the way and bring your therapies to life.

Ramp Up Global Financials

Ensure seamless global expansion with Multiple Entity Reporting, Multiple Currency Reporting, Statutory Reporting, Intercompany Processing, Elimination and Consolidations.

Optimize Financial Planning & Analysis

Reduce spreadsheet reliance and risk by automating the Clinical Trial Expense Accrual Process with our Pharma Bundle built on the NetSuite SuiteSuccess for Pharma Financial Deployment platform.

Includes:
- Global Financials
- Purchasing to Pay
- Contract Expense Accrual Management
- Approvals
- SOX Compliance & Documentation

Streamline Supply Chain Manufacturing

Drive development with GMP Manufacturing Bundles on top of NetSuite ERP/MRP to manage manufacturing with functionality that includes GxP Material Onboarding, Purchasing/Inventory/ Manufacturing, and Sample Management.

Expedite Supply Chain Sales

Accelerate deployment and manage regulatory requirements, inventory, storage, sales and returns while integrating with 3PL companies to warehouse, ship and handle accounts receivable.

Achieve Commercialization!
Bring your innovative therapies to life—again and again.

Automate Complex Operations

Clear obstacles on your path to commercialization—and get your life-saving therapies to the public.

AdaptaLogix, let us be your GMP partner on the path to commercialization. Your solution is a bundle away.
